How to get started?

Home Manager manual: nix-community.github.io/home-manager

3.2. Standalone setup

To prepare an initial Home Manager configuration for your logged in user, you can run the Home Manager `init` command directly from its flake.

For example, if you are using the unstable version of Nixpkgs or NixOS, then to generate and activate a basic configuration run the command

```
$ nix run home-manager/master -- init --switch
```

Appendix A: Home manager options

programs.git.enable

Whether to enable Git.

Type: boolean

Default: false

Example: true

Declared by:

<home-manager/modules/programs/git.nix>

programs.git.package

Git package to install. Use pkgs.gitAndTools.gitFull to gain access to **git send-email** for instance.

Type: package

Default: pkgs.git

Declared by:

<home-manager/modules/programs/git.nix>

programs.gitaliases

Git aliases to define.

Type: attribute set of string

Default: { }

Example:

or use the search

mipmip.github.io/home-manager-option-search/
